Digital design and  
development

Sourav Kumar Avi

UWE Bristol

# Persona

## Persona

Avi is a Bus Passenger. He's a Student of UWE Bristol.

## Needs/Pains

- Regularly travels to UWE by bus
- Needs a quick and intuitive interface to plan his journey
- Wants to view real-time route maps and location of bus stops
- Needs to compare fares across different bus operators
- Wants a centralised platform to get all bus-related information
- Has limited time between classes, so needs fast access to schedules

## Solution

- Home Page with clear navigation to key features
- Interactive Map View using Open Data Bristol to show real-time routes
- Bus Operator Details Page to identify companies operating in Bristol
- Fares Page with embedded tables showing ticket prices
- Consistent layout and visual cues to save time in accessing information
- Option to extend into mobile-friendly view for access on the go

# UX Mapping

Avi discovers the  
Bus App via student  
email or UWE webste

Avi wants to check  
bus fares and  
schedules

App uses Avi's locati-  
on to find nearest  
bus stops

Avi sees bus routes  
and stop details in  
a table format

Add link to UWE  
student portal  
or emails

Provide quick  
access to fares  
and real-tim timetable

App must reg  
permission for  
location

Offer filter for bus  
lines, times, and  
operators

Avi checks the route  
on a live map

Avi wants to book  
a ticket via  
smartphone

Avi tracks bus  
arrival times

Avi heads to class  
on time thanks to live  
updates

Provide quick  
access to fares  
and real-tim  
timetable

Integrate secure  
online payment  
and booking option

Show real-time  
arrival countdown  
for stops

Notifications/  
reminders for  
selected routes  
or schedules

# Mood Board

---

Fonts:

**This is my app**

The font name is "Sigmar" which is available in <https://fonts.google.com/>

I chose the "Sigmar" font for the headline because it's bold and friendly—great for a student-focused app. The sky blue color complements the interface and provides strong contrast against the background, making the headline stand out clearly.

For anyone needs to find a bus

I chose "Fresca" as the secondary font because it's clean, modern, and highly readable—ideal for body text and supporting content. It pairs well with the bold style of Sigmar, maintaining a clear visual hierarchy throughout the interface.

# Design Critique

## 👥 Peer Feedback 1:

"The map view is useful, but it's not immediately clear which bus stops are closest to the user. Also, the fares page looks a bit plain and could use icons or visual separators."

-  **Reflection – What, So What, Now What?**
-  **What?**
  - Feedback highlighted that the bus stop proximity on the map isn't obvious.
  - The fares page layout was considered too plain.
-  **So What?**
  - Lack of visual cues on the map may affect how easily users identify important locations like nearby stops.
  - A plain fares page might reduce user engagement and readability.
-  **Now What?**
  - Plan to enhance the map by adding location pins or a "Nearest Stop" toggle.
  - Will redesign the fares layout with icons, color bands, or card-style sections.
-  **Verdict: Valid and helpful – changes will be implemented in future versions.**

## 👥 Peer Feedback 2:

"The home page looks a bit minimal – maybe you could add some icons or illustrations to make it more lively."

-  **Reflection – What, So What, Now What?**
-  **What?**
  - The home page was perceived as too minimal or plain by a peer.
-  **So What?**
  - Although more visuals could improve aesthetic appeal, the minimalist layout was intentional—designed to focus on clarity and fast access.
-  **Now What?**
  - May consider adding small icons or subtle visuals in future updates, provided it doesn't distract from core functionality.
  - Will maintain the current minimal design for usability and mobile responsiveness.
-  **Verdict: Minor feedback – valid suggestion, but current design was intentional.**

Thank You
